The UK Food & Beverage Sector

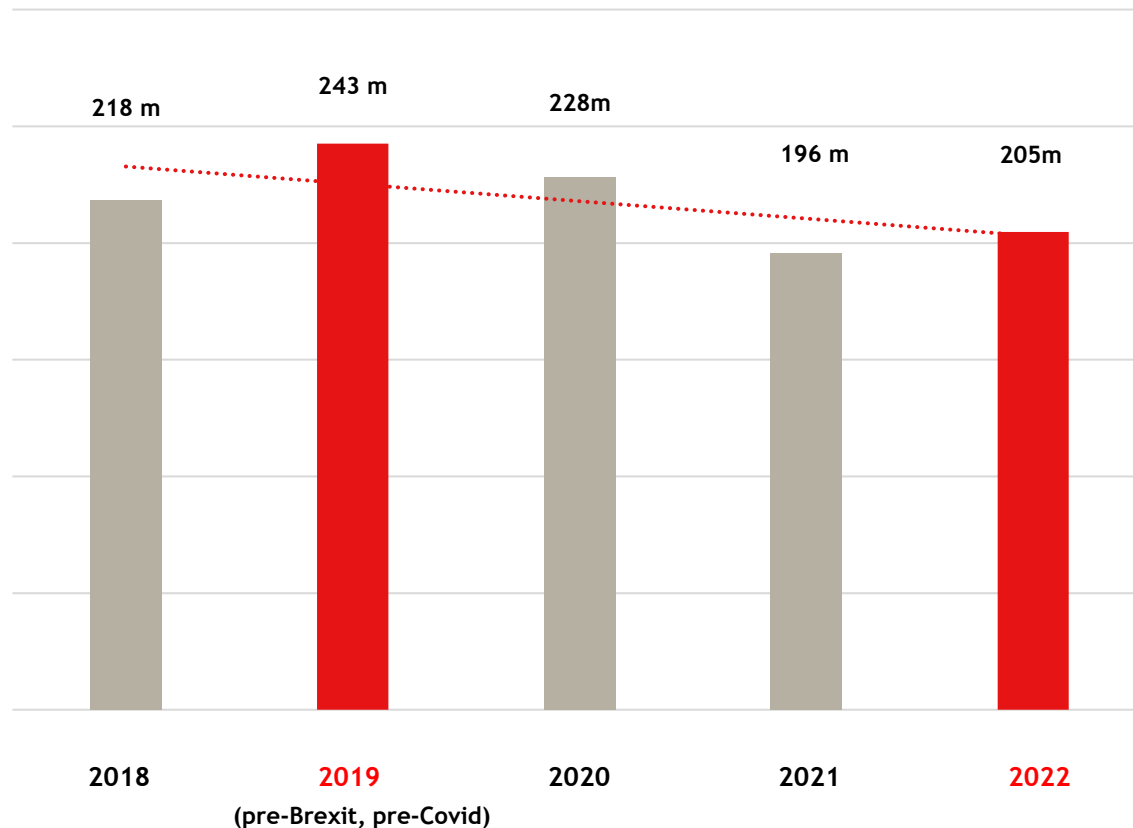

- F&B industry is the **UK's biggest manufacturing sector** by turnover (EUR 129 bn)
- Food accounts for **11 % annual household budgets** (20 % when including out-of-home consumption)
- **Only 54 %** of food consumed originates in the UK
- UK relies heavily on imports, **30 % come from the EU**
- Number of FDI projects in F&B industry has decreased from an average of 150 projects per year 2016-2017 to 100 projects per year 2022-23
- **Cost of Living Crisis:** dining out suffers, high demand for premium categories in retail
- Special dietary demands on the rise (**7.5 mn people are vegetarian or vegan** in the UK)
- Alcoholic beverages: steady growth of alcohol-free versions/low alcohol beverages

Trade Patterns Post-Brexit

- **Overall F&B imports to the UK** have fallen by 1 % since Brexit (2019: 63.6 bn | 2022: 63 bn)
 - In contrast overall exports have risen by 14,9 % (2019: EUR 423 bn | 2022: EUR 486 bn)
 - **Imports from the EU** -4.4 % (2019: 46.1 bn | 2022: 44.1 bn)
 - **Imports from non-EU** +7.4 % (2019: 17.5 bn | 2022: 18.9 bn)
- **Animal feed imports to the UK** have risen +5.5 % (2019: 3.6 bn | 2022: 3.8 bn)
 - **Imports from the EU** +8,6 % (2019: 2.1 bn | 2022: 2.3 bn)
- The **UK is the EU's largest export destination** for agricultural goods and f&b and the 2nd largest origin of EU imports (Brazil ranks 1st)
- New **UK trade deals** (e.g. Australia, New Zealand) have not yet shown any impact on trade patterns.
- Some EU exporters have **reorganized supply chains**.
- **Latest results: 2022 UK food, feed and beverage international trade:**
 - Exports 2022: EUR 28.7 billion (+13 % compared to 2021) | main destinations: Ireland, France, USA, Netherlands
 - EU 15.9 bn (+11.5 % compared to 2021)
 - Imports 2022: EUR 66.8 billion (+5,4 % compared to 2021) | main sources: Netherlands, France, Ireland, Belgium
 - EU 46.4 bn (+8.3 % compared to 2021)
 - Highest UK export value: whisky, totaling EUR 7.4 bn
 - Highest UK value category for imports: Fresh fruit & vegetables, EUR 7.6 bn

AUSTRIA-UK FOOD, FEED AND DRINK EXPORTS

Austrian food, feed & drink exports to the UK

Comparing **2019** (pre-Brexit, pre-Covid) to **2022**:

Biggest gains

- ✓ Preparations for animal feed EUR 33.3 m -> 39.4 m | **+6.1 m**
- ✓ Cheese and curd cheese EUR 10.2 m -> 14.3 m | **+4.1 m**
- ✓ Corn: EUR 2.4 m -> 3.7 m | **+1.3 m**
- ✓ Chocolate: EUR 8.7 m -> 9.8 m | **+1.1 m**

Biggest declines

- Mineral water EUR 53.7 m -> EUR 29.9 m | **-23.8 m**
- Meat and preparations of meat EUR 26.7 m -> EUR 11.8 m | **-14.9 m**
- Preparations of cereals, flour, starch, milk and bakery products EUR 51.7 m -> 45.9 m | **-5.8 m**
- Edible fruit, citrus fruit peel, melons EUR 7 m -> 3.7 m | **-3.3 m**

Post-Brexit: Frequent changes of course with new regulations

- **Brexit** made „the life of an exporter“ more difficult
 - Movement of goods more complex and requires thorough preparation
- "Border Target Operating Model" **BTOM** affected by „politics of Brexit“
 - Multiple postponements of customs controls for EU goods
- **On 29 August 2023, the British government announced new deadlines for the introduction of TOM:**
 - 31.01.2024: Veterinary certificates and phytosanitary certificates mandatory for high and medium risk products
 - 30.04.2024: Introduction of controls for animal products and plant products with a medium risk at border control posts (BCP)
 - 31.10.2024: Introduction of safety and security declarations for all EU imports
- **What's new and what has changed - our experts will give you an overview**

WKO-WEBINAR

UK – BTOM

upcoming SPS controls in live animals and POAO

23. November 2023

ONLINE

CONTENT

- 1. Introduction**
- 2. STATUS QUO**
 - a. What needs/needed to be considered so far?
 - b. What's new – BTOM?
- 3. TOM milestones and deadlines**
- 4. Risk categories**
- 5. Export Health Certificates (EHC)**
- 6. Summary**

UNITED KINGDOM (UK) - BTOM

The entry into force of provisions and deadlines for the EXPORT of foodstuffs to the UK per 01.01.2021:

- **step by step implementation (last amended 28 August 2023!)*
 1. since 1 January 2021: „high risk SPS products“ → EHC (+UNN), pre-notification and documentary checks at the BCP + registration of the establishment in TRACES!
 2. since 1 January* 2022: **PRE NOTIFICATION** (via IPAFFS) for **all products of animal origin (POAO)** as well as for **animal by products (ABP)**
 3. from (expected?) **31st of January 2024** :
 - a) new „**Border Target Operating Model**“ (**TOM**) for imports including „**Single Trade Window**“ (= a single gateway for application and management of Trusted Trader status)
 - b) **risk categorisation** (Low/Medium/High)
 - c) **Accredited Trusted Traders** (Accredited Trusted Trader Scheme – ATTS)

UNITED KINGDOM (UK) - BTOM

The entry into force of provisions and deadlines for the EXPORT of foodstuffs to the UK per 01.01.2024:

- ***step by step** implementation (*last amended 28 August 2023!*)

a) Timeline of TOM milestones

- **from 31 January 2024:** Export health certificates (EHC) and phytosanitary certificates are introduced for **medium risk** animal products (POAO incl. ABP) and plants and plant products imported to GB from the EU.
- **from 30 April 2024:** Documentary and risk-based physical and identity checks at the border (**BCP's**) are introduced for medium risk animal products, plants and plant products imported to GB from the EU.
- **from 31 October 2024:** Safety and Security declarations are required for EU imports. Alongside this, use of the UK Single Trade Window will remove duplication across pre-arrival datasets where possible.
- **from 31 October 2024:** Documentary and risk-based physical and identity checks on medium risk animal products, plants and plant products will be introduced at ports on the West Coast of Great Britain

UNITED KINGDOM (UK) - BTOM

b) TOM Risk categorisation for animals and POAO **Low/Medium/High**

- **LOW risk:** Provision of a pre-notification data set (via IPAFFS) and commercial documentation (importer) will be required, there would be no requirement for health certification or routine physical border checks. (= shelf stable > *Examples: UHT milk, composite products, insect protein/feed*)
- **MEDIUM risk:** Imports will require pre-notification (via IPAFFS) and EHC and be subjected to documentary checks and risk-based identity and physical checks at the BCP. (*Examples: Meat and meat products, chilled raw milk products, eggs and egg products, some ABPs/pet food*)
- **HIGH risk:** Imports will require pre-notification (via IPAFFS), EHC, documentary checks and a higher degree of physical and identity checks at the BCP – with some exceptions, live animals will be subject to 100% identity and physical checks (*Examples: live animals and germinal products, goods under safeguard measures*)

UNITED KINGDOM (UK) - BTOM

b) TOM RISK CATEGORISATION for animals and POAO **Low/Medium/High**

- „no further changes“ regarding risk categories until April 2024> specification for certain goods (composites?)
- categories in a table format incl. a **look-up tool** designed to help Traders searching & finding the BTOM risk category by CN code.
- Check import risk categories and related rules for animals and animal products imported from the EU to Great Britain, from 31 January 2024 - GOV.UK (www.gov.uk)

UNITED KINGDOM (UK) - BTOM

b) TOM Risk categorisation for animals and POAO

Low/Medium/High

The screenshot displays a spreadsheet titled "Target Operating Model (TOM) risk categories for animal and animal product imports from the EU to Great Britain: searchable list with commodity codes". The spreadsheet is divided into several sections:

- Target Operating Model (TOM) risk categories for animal and animal product imports from the EU to Great Britain: searchable list with commodity codes**
 - Last updated: 2 November 2023
 - This spreadsheet contains 1 worksheet with a search function, 1 worksheet with a table of risk ratings and 1 worksheet with notes.
 - Find a commodity code**
 - Use the [trade tariff service on GOV.UK](#) to find your 10 digit commodity code.
 - Search for a risk category**
 - Use the 'search by code' worksheet to search for the risk category of a specific commodity.
 - Use the 'list of commodities' worksheet to see a list of animal and animal product commodities and their risk categories.
 - Commodities are rated as: high, medium or low.
 - Some commodities have a combination of levels. For example, 'medium or low'. The comments in column C provide additional information to help you work out which rating will apply.
 - Find more information**
 - If you cannot find the risk category for a commodity, or if the commodity has more than one potential risk category, refer to the TOM risk categories summary tables for more information about how commodities will be categorised (see link in cell A9).
 - [TOM risk categories for animal and animal product imports from the EU to Great Britain: summary tables on GOV.UK](#)
 - Notes**
 - Some cells in the comments column refer to notes. These can be found in the notes worksheet. It is important to check these to confirm the risk categorisation of your product. Note markers are presented in square brackets, for example: [note 1]
 - Accessibility**
 - This spreadsheet may open in Protected View. To use the search function you will need to click the Enable Editing button at the top of the spreadsheet.
 - There is a locked formula in cell A5 of the 'search by code' worksheet. This cell also displays the search results.
 - Give feedback**

The spreadsheet also includes a table with the following columns: Risk category, Commodity code, Commodity description, and Comments. The table is currently empty, with a placeholder "#NAME?" in cell A5. A search bar is located in cell B3, with instructions: "Type the 10 digit commodity code in cell B3 and press enter. The risk category will appear in cell A5. You can only search for one commodity at a time."

The spreadsheet is titled "Search by commodity code" and includes a search bar and a table with columns: Risk category, Commodity code, Commodity description, and Comments. The search bar is highlighted in yellow. The table is currently empty, with a placeholder "#NAME?" in cell A5. The spreadsheet is titled "Search by commodity code" and includes a search bar and a table with columns: Risk category, Commodity code, Commodity description, and Comments. The search bar is highlighted in yellow. The table is currently empty, with a placeholder "#NAME?" in cell A5.

Meat products for human consumption (MP-PROD) GBHC352

II.a. Certificate reference no.	II.b.
---------------------------------	-------

⁽¹⁾[(e)] the intestines were sourced from a country or region with negligible BSE risk, and are derived from animals that were born, continuously reared and slaughtered in a country with negligible BSE risk and that passed ante and post-mortem inspections, and

⁽¹⁾**EITHER** ⁽¹⁾[(i)] if the intestines were sourced from a country where there have been BSE indigenous cases, the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants has been enforced;]

⁽¹⁾**OR** ⁽¹⁾[(ii)] if the intestines were sourced from a country where there have been BSE indigenous cases, the meat products do not contain and are not derived from specified risk material in accordance with GB regulations;]]]

⁽¹⁾[(if the product contains material from domestic solipeds, the following must be met:

⁽¹⁾**EITHER** [the meat was obtained from domestic solipeds slaughtered in a third country in compliance with GB regulations regarding:

- period of residence in the third country before slaughter;
- administration of certain substances; and
- monitoring of certain residues and substances;]

⁽¹⁾**AND/OR** [the meat of domestic solipeds used in the products was imported from Great Britain;]]

⁽¹⁾**[PHD103 Trichinella requirements**

the meat products have been obtained from meat from domestic porcine animals which:

⁽¹⁾**EITHER** [has been subjected to examination by a digestion method with negative results]

⁽¹⁾**AND/OR** [has been subject to a freezing treatment];

⁽¹⁾**AND/OR** [is derived from domestic porcine animals either coming from a holding officially recognised as applying controlled housing conditions in accordance with GB regulations or not weaned and less than 5 weeks old;]]

⁽¹⁾**[PHD104 Trichinella requirements**

the meat products have been obtained from horse meat or wild boar meat which meets the GB regulations in regards trichinella controls;]

⁽¹⁾ Keep as appropriate.

Official Veterinarian

By signing this certificate, I certify that the requirements laid out above and in the accompanying notes for completion have been met.

Name (in capital letters): Qualification and title:

Date: Signature:

Stamp:

Meat products for human consumption (MP-PROD) GBHC352

Part III. Notes for completion

These notes for completion must be read and understood by the certifying officer before signing the certificate. Notes are set out in sections that correspond to the sections in the certificate. By signing this certificate, certifiers are verifying that the consignment meets the requirements set out in the certificate and any relevant corresponding notes for completion.

These notes do not need to be printed as part of a paper certificate that accompanies the consignment or in any electronic copy of the certificate.

References to European Union legislation within this certificate are references to direct EU legislation which has been retained in Great Britain (retained EU law as defined in the European Union (Withdrawal) Act 2018) and can be viewed on the UK legislation website (legislation.gov.uk).

References to Great Britain in this certificate include Channel Islands and Isle of Man.

References to GB requirements refer to the requirement(s) of Great Britain as set out in the accompanying notes for completion.

Part I

Box reference 1.8: Region (if appropriate) referred to in a document relating to 'meat products' as published on gov.uk, in accordance with Decision 2007/777/EC. ⁽¹⁾

Box reference 1.11: Place of origin: name and address of the dispatch establishment.

Box reference 1.15: Registration number (railway wagons or container and road vehicle), flight number (aircraft) or name (ship). Separate information is to be provided in the event of unloading and reloading.

Box reference 1.19: Use the appropriate Harmonised System (HS) code under the following headings: 02.10, 16.01, 16.02 and 05.04.

Box reference 1.23: Identification of container/Seal number: only where applicable.

Box reference 1.28: Species: select among species described in AHP301(A);

Nature of commodity: choose among the following: meat product, treated stomachs, bladders and intestines;

Abattoir: approval number of any abattoir or game-handling establishment;

Cold store: any storage facility;

Manufacturing plant: approval number.

Part II

Animal Health

AHP100 Product requirements

Treatment is specified in a document relating to 'meat products' published on GOV.UK, in accordance with Decision 2007/777/EC. ⁽¹⁾

AHP301 Product requirements

Meat products must be as laid down in point 7.1 of Annex 1 to Regulation (EC) No 853/2004 and treated stomachs, bladders and intestines that have undergone one of the treatments referred to in a document relating to 'meat products', 'poultry and poultry products' and 'fresh meat of ungulates' for EU countries and EFTA states in accordance with Decision 2007/777/EC. ⁽¹⁾

For completion of the table:

(A) Insert the code for the relevant species of meat product, treated stomachs, bladders and intestines where:

- BOV = domestic bovine animals (*Bos Taurus*, *Bison*, *Bubalus bubalis* and their crossbreeds)

Export of food and agricultural products post-Brexit

An importer's perspective post-Brexit and practical approach to BTOM

Tom Campbell-Smart
Brand Organic

Importing into the UK post-Brexit

NOVEMBER 2023

www.brandorganic.co.uk

- > Import agency founded in 2018.
- > Represent 19 brands in the UK market (15 EU).
- > Specialise in importation of branded natural & organic food & drink products.
- > Customers include 15+ wholesalers, Planet Organic, Abel&Cole, Whole Foods Market, WH Smith, Coop and more.
- > Shortlisted for Business of the Year at the International Trade Awards 2023.

Tom Campbell-Smart

- > Operations Director, joined company in 2019.
- > Overseen rapid growth in import calendar as a result of post-Brexit regulatory changes.
- > Strong advocate of organic and the benefit of international trade.

UK Market Overview

1

High Inflation is affecting shopper behaviour.

Food prices have risen 12.2% in last 12 months.

2

Economy not in growth; recession expected.

High interest rates to curb inflation.

3

Brexit has posed logistical challenges and supply chains have been stretched.

Likely this will continue.

4

Consumers increasingly shopping for 'Value'.

Discounters have seized considerable market share.

5

Advanced D2C market; growth has slowed since pandemic but still central to many younger consumers in particular

Top Consumer Trends

1

Value.

2

Conscious
Consumerism.
(Authenticity,
transparency
etc)

3

Health &
Wellness.

4

Personalisation
&
Customisation.

5

Digital.

The Role of an Importer post-Brexit

- > All goods must now be imported.
- > Importer takes full legal responsibility for goods.
- > Liability cannot be passed back to the EU.
- > Importer must be a UK company, with a recognised EORI number, VAT number etc.
- > If importing organic, the importer must hold an organic licence.
- > If importing food & drink, they should be a registered food business.
- > As of 2024, the name and address of this importer must appear on the label if the goods are retail-ready.
- > There are additional costs involved in the supply chain as a result.

How Brand Organic has Changed

2018

- > Formed as a broker working with EU firms.

2019

- > Brexit agreements drafted.
- > Business as usual.

2020

- > Start of transition period.
- > Company took steps to pivot to role of importer.
- > Pandemic restrictions commenced.

2021

- > Trade commenced across custom border.
- > Started to import at small scale.
- > Pandemic restrictions eased.

2022

- > Scaled up number of imports due to increasing demand.
- > Team tripled in size, including technical.
- > New warehousing.

2023

- > Sourcing outside of EU.
- > Gearing up for changes in regulations.
- > First multiple listing.

Upcoming Changes to Brexit Legislation

• Oct 23: EHCs for ROW.

• Jan 24: SPS changes, both EU and ROW.

• Oct 24: Safety & Security declarations.

2024 marks the first year where import procedures for EU & ROW become the same.

SPS Changes: Plants

All goods (EU & ROW) categorised by risk:

HIGH Risk	MEDIUM Risk	LOW Risk
Pre Notification	Pre Notification	Pre Notification
Certificates Required	Certificates Required	Certificates Not Required
100% Inspected	% Inspected	No Inspections.

Important to understand your risk categories:

Plant-based: <https://planthealthportal.defra.gov.uk/trade/imports/target-operating-model-tom/tom-risk-categorisations>
POAO: <https://www.gov.uk/government/publications/risk-categories-for-animal-and-animal-product-imports-to-great-britain>

The FBO Address

You must include a business name and address on the packaging or food label of pre-packed food products. This must be either:

- the name of the business whose name the food is marketed under
- the address of the business that has imported the food

You can continue to use an EU, GB or NI address for the FBO on pre-packaged food or caseins sold in GB until 31 December 2023.

From 1 January 2024, pre-packaged food or caseins sold in GB must include a UK address for the FBO. If the FBO is not in the UK, include the address of your importer, based in the UK.

The address needs to be a physical address where your business can be contacted by mail. You cannot use an email address or phone number.
